

There Is No Box! Nor Ever Has Been! -

By Dr. Lynn Sereda

The Ultimate Demise - Of Mere Linear Sequential – So Called Rational Logical – Always Either / Or Dichotomous Polarized - & Thus Inevitably Conflict Resulting – Mere ‘Thinking Based’ – Human Information Processing - In Relation to Our Rising Tide of Simultaneous / Instantaneous – & Thus Far More Core / Contextual Synchronus Emerging – Ever More Whole Field Integral ‘Gestalt or Insighting Based’ – Positively Holographic Supra Conscious / Super Logical - Endlessly Brilliant Possibilities

Picture that you your self have been designed / evolved as the most incredible ‘Potentially Quantum Energy Level Empowered’ – Positively Brilliant Information Processor - Solution Synthesizer Ever Devised. A computer that is actually capable of fanning out it’s inter-connective, informational integrative effectiveness. Into whole fields of information - instantaneously / simultaneously - at non-local Light Speed - in a mere flash! A computer that is so potentially wizard like amazing, that by learning to fully operate it. We can actually enable ourselves to realize our wildest dreams. So potentially capable that our very own wonderful wizards within can actually help us manifest the full whole range of fulfillments - we long for. And that more and more of us in increasing numbers are actually learning to use this phenomenal computational capacity within our selves, in this new quantum level, supra logical x super conscious, way.

So what motivates me to be saying this? Well because in truth the next generation of computers, modeled upon what we already know about how our own human awareness field works. And which are being developed as we speak. Are going to actually be called – ‘Quantum Computers’! Designed to be way more capable of creating totally mind blowing - high speed holographic images – in a mere flash. Via far more instant spread of core contextual, multidirectional firing subtle energy driven whole field inter-connective chips. Such as are thus going to be able to integrate information throughout a whole informational system simultaneously - in an instant! Thereby enabling us to work much more directly with holographic images in order to help ourselves generate for more effective holistic solutions – in relation to whatever hoped for outcomes - we may set!

In this respect - imagine having a brain field with as much as a 100 million different kinds of neural cells. Then picture that each individual brain cell itself - is able to store huge multiple, multiple, organized bit bytes of information - at the highly complex subtle microtubule based level - of intra-cellular storage differentiation. And that far beyond this each brain cell in turn, is actually growing up too as many as a thousand dendrites that are floating in cerebral spinal fluid. With each dendrite in turn longing to connect up into whole field inter-relative complex web like networks - with other cells. And hopefully this image helps you to see that our awareness system is actually designed to enable you to effectively create literally gazzillions of full matrix interactive possible - complexes of amazingly integrally organized – intentionally solution focused - webs of information. Potentially in every conceivable core contextual - complexly spread of effect interactive direction - all at once. In relation to at least as many inter-connective possibilities - as there are grains of sand on planet earth. Complete with an inherent ability to project most likely probabilities – with respect to any given solutions potential for successful results.

And perhaps now you can begin to get just how hugely solution capable powerful the ‘wonderful wizard’ computer we all carry around on board within us - actually is. Which in terms of current technology some have even suggested, might be at least the size of Texas 10 stories high, perhaps even as big as planet earth and beyond. Then picture someone who has become so dependent on running their inter-connective field in the same old, same old, extremely linear sequential limited - rational logical pre-formed ‘thought’ pattern ways - alone. Only within the limited framework of so called pre-conceptually formed, locked into the same old, same old idea based – far too boxed in formations only. Based on a mere fraction of the subtle power source that such a computer might require. And here taking this all together you have exactly what tends to limit such a locked into narrow band ‘thinking’ alone - persons. More full-on inner how to help one’s self manifest a great life inventive capacity. To the proverbial 10% or less of their more expanded gazzillionaire enabled, positively brilliant far more wow wonder-fully inspired, solution generative potential.

Based on this image, perhaps you can now better sense just how much better off we would all be to teach ourselves how to open our larger field inter-connective matrices, and thus much more holographic to infinity and beyond solution generative possibilities? In such a way as to actually jump our quantum computing capabilities well beyond ‘thinking’. Into those much more whole field integral holographic supra logical solution oriented information synthesizing processes - we refer to as ‘insighting’. In the very same way that Einstein was able to see his whole theory of relativity in an instant. Simply because you, yes you have the very same internal

gazzillionaire based inter-connective capacity to invent your own great life possibilities to the max - within your very own self. Within the context of your very own unique field of interest talent gifts & intentions! Insofar as you will finally just agree to learn how to operate this brilliant potential – you already have within you!

Actually you could say in this much greater respect, that the huge difference between mere ‘thinking’ and our much more holographic capacity for ‘insighting’. Is kind of like the difference between taking a single diameter slice into any round ball. And then trying to organize all the core / contextual information we have gathered over the course of our life with respect to some given whole field larger picture - of so called objectively differentiated reality. Into some particular point along this single one dimensional linear either / or polarized so called rational logical axis of understanding only. In relation to these one dimensional bio-polar only - extremes. Within which we thus constantly keep our selves trying to keep on generating the very sort of inevitable conflictual polarizing results. That always seem to come along with mere ‘thought’ based, bi-polar linear sequential imposed, one dimensional solutions - alone. As though some single dimension is the one and only either / or polarized, and thus inevitably argumentative perspective, we must confine our selves into convincing not just our self - but all others we encounter to thus also take - on some given issue.

And our much rather finally being able to truly get it! That our more expansive core / contextual based, way more holographic firing awareness principle, is literally fully equipped to integrate an infinite number of diametrically opposed slices from point to point. Inside any one such whole round ball park of distinctive issue related information - all at once at the very same time. In such a way that can enable us to transcend completely beyond anymore compulsively felt need - to stay stuck in some kind of one diameter polarized perspective alone. With respect to some whole field embedded issue in relation to which we would like to invent some new creative best possible way of organizing - some particular given field of information. In such a way that we might much rather help our selves to suddenly be able to light speed jump our much more whole field embedded awareness – all up. Into the very kind of much more spherically - core / contextual holographic - quantum field attuned much greater understanding possibilities. Which is to say, more and more of us are discovering we are fully equipped to actually integrate an infinite number of diameters into whole field encompassing networks - of truly magnificent solution generative possibility – well beyond ordinary ‘thinking’ - by perhaps as much as the power of 10. By way of discovering how yes we-can enable our awareness field able to much more core / contextually ‘flash field vision’ or ‘in-sight-fully see’ into whole fields of information. With respect to some particular issue in relation to which we

would like to create the most effective issue relevant solutions – that we possibly can.

This in other words is the best way I know how to describe the huge difference between our big totally open mind possibility - to much more holographically 'insight' our way forward into far more integrally effective solution fields. As opposed to keeping ourselves stuck in mere one diameter linear slices and thus inevitably polarized conflictual 'thought' based – way too boxed in perspectives only. With all due respect to some relevant issue around which we would much rather create our best possible solutions. In relation to what always amounts to some spherical whole anyway. Much as is always actually the case within any infinitely inter connected field of 'Quantum Level Energy Itself. Out of which any given differentiable thing tends to manifest in the first place. See the point, why polarize a sphere, when that sphere actually has an infinite number of poles. Much better to discover that more holistic whole field aware 'insighting' process wherein we can instantaneously / simultaneously flash jump our awareness into our whole field of stored information. In such a way as to help ourselves generate much holistically encompassing core / contextually integrated - positively fantastic - totally mind blowing solutions – that would much better serve all of us. In huge sense of better helping ourselves to create the very best non-polarizing solutions possible. In such a way that would spare us the constant pain, that always seems to come along with mere one dimensional inevitable conflict producing mere polarized 'thinking'.

Based on these understandings - the greater urgency being conveyed here. Is that we are rapidly approaching a time within the context of our relatively small, round sphere whole planet. When it is imperative that we teach ourselves how to move beyond so much reliance on trying to mere 'think tank' our way toward one small byte either or – constantly polarized and thus inevitably ineffective – mere part solutions. By way of supporting ourselves to develop our innate possibility to much more holographically open our greater awareness field up – into the kind of more unlimited perspectives. Wherein we can instantly in every much more 'open sky insight' - based moment. Suddenly find ourselves able to fire up our more holistically oriented, whole field abilities to integrate so much multidimensional core contextual information - in a single flash. That we in this way can suddenly find ourselves able to 'vision' truly brilliant much more whole picture encompassing ways - forward. Wherein so called polar opposites can have the outer boundaries space required to effectively co-exist. Indeed oftentimes so brilliant, that such solutions not only tend to transcend all those inevitably conflictual, boxed in like polarized ideas. Such as tend to result as a consequence of our mere 'thought' based one slice of the pi linear sequential outlooks alone. But are much rather likely to be so good,

that they often take years for us to fully appreciate the full extent of such 'insighted' brilliance. Much in the same sense that within the context of modern left brain, right brain, whole being psychology. We can now much better appreciate the huge whole awareness meaning – behind our founding fathers intention to create a social contract that has very best possibility to allow us as individuals – to fully pursue 'life' (in sense of more fully awakening our feeling & emotional vital energies within us), 'liberty' (in the sense of more fully freeing up our supra logically great life inventive capacities within us) & 'true happiness' (in the sense of more fully awakening our hearts the very core processing unit of our quantum level computer within – the only place from which any of us has the possibility to manifest a truly happy life). In relation to the very deepest possible meaning that these words can possibly imply. Within a core / contextual great life inventive oriented framework - which can make it possible for the wisest possible range of human differences – to peacefully co-exist.

Why else do you suppose the obvious standing joke in modern medical pharmaceuticals goes like this? We want you to take this or that drug to help cure your heart or your digestion, or your headaches. But whoops, sorry, the small print trailer message keeps saying that we may very well destroy your kidneys, or your brain cells, or your liver function, even your sex drive, in the process. You could say the same holds true for modern economic theory. Constantly trying to understand the world of money as a medium for the exchange of production oriented energy - from some mere one dimensional perspective alone - when we have already jumped ourselves up into an instant global information based economy. Is simply not going to be enough! The time has come for us to begin to create more global economic models to help guide ourselves into even more effective ways of doing business. Kind of in the same way that scientists have been working on global models to predict and thus hopefully better help us manage climate change, for some time now. Other than wise to the extent we keep separating and polarizing - we will tend to keep fear based 'think tanking' ourselves into bigger & bigger black holes – of economic woe.

A good way to help your self better understand just what more holographic solution generation is all about. Is to take some time to look to the literature on fractal formation. Fractals represent basically how all reasonably distinguishable entities or forms. Keep core contextually spread of effect growing into ever more sophisticated multi-dimensional fields, of definable, so called objective structure. Based on certain informationally coded rules which support the progressive unfolding of basic quantum energy – into the integration of ever more geometrically complex - reasonably stable, holographically inter-active, harmonically resonant forms. This

includes the core / contextual way 'insights seem to instantaneously / simultaneously bloom into whole integrated fields of 'insight' - within our field of conscious awareness. Much in the same way that Kekoule was able to famously 'insight' more circularly formulated equations as opposed to the mere linear sequenced straight line formulas. Such as were sufficient to describe inorganic compounds before his famous snake swallowing it's own tail insight, wherefrom he created the notion of a closed circle, as the best way to characterize the higher order level of organic compounds. This in turn implies that our new next generation mathematics is going to be based more on our ability to develop multidimensional, sacred geometric pattern based, ever higher order core / contextual unfolding, mathematical rules to predict the generation of holographic fractal structures. In other words this suggests, it is going to be incumbent upon us to begin to develop 3 dimensional geometrical formula's, over and above relying on mere numbers based formulas alone. In such a way that will help us to build the long sought bridge – that is going to at the same time not only help us explain – the way our universe itself functions. But which will also explain the way our human consciousness functions to build the very sort holographic solution oriented images. That are going to be far more likely to help us generate - far more holistically effective ways of doing things. We plan to have much more to say about this new emerging trend in a later proposed work - The New Emerging Supra Logics - of Holographics. As well as in my 'Quantum You' co-authored new book – with respect to how our growing understanding of the quantum field - is helping us to discover just how we can better enable ourselves to manifest way more holographic solutions into form.

Heare ye then this, the positively great news being conveyed here, is that the giant quantum level potentially brilliant computers we all have within us. Actually appear to have been designed to function way more whole field holographically - than most of us have so far been willing to support developing - within ourselves. In the sense that we actually have the possibility to encourage the generation of the very kind way more whole field attuned inner visionary holographic solution generative images we are talking about. To be able to come through us - In the form of those more here and now embedded awareness processes we have come to refer to as 'intuition & insight' - on a much more regular basis. Wherein yes we-can find ourselves far more in the moment zoned in enabled than we ever merely 'thought' before. To actually be able to brilliantly invent the positively great whole field solutions we really long for.' With respect to whatever intentionally articulated roles we may keep choosing to play ourselves

forward in relation to, with respect to this absolutely huge super light speed translucent, without beginning or end infinite. Essentially unified, positively beyond self transcendently intelligent – way big whole harmonic resonant picture - we all keep finding selves living within here.

Much in the same sense that all kinds of great creative innovators, or even top notch athletes seem able to manage. Whenever they find themselves able to bring them selves much more expansive present attuned - aware – ‘into their zone state way of being’. Wherein this kind of state such highly effective solution generators, suddenly find themselves way more here and now pure open field in the moment embedded, ‘intuitive x insightful’ brilliant effective. Than whenever they stay stuck in more so called normal - states of being. In other words discover how to access the very sort of state which more and more people, especially our younger children, are finding they ability to shift into. Inasmuch as this ability to find one’s zone way of much more holographically expanded awareness, is the only way it is possible to get to some next higher order level of some current computer game. By way of teaching them selves to remain centered relaxed grounded present enough, to shift into their parasympathetic side of their emotional or vital energy generating nervous system. To the point where they thus seem much better able to integrate not just a much wider band, in the moment holographic, viewpoint. But also learn how to integrate many more bits of information per moment, in each quickly unfolding, much more open field expansive, moment. In comparison to the old one slice of the pie at a time way of trying to merely, keep one’s self linear sequentially, ‘thinking out’ - the best way to act.

Such that once shifted into this wide band, ‘more totally zoned in’ way of information processing, one’s more quantum byte, way more opened up whole field attuned, full matrix aware internal computer. Actually becomes able to instantly ‘vision see’ or in the moment ‘encompass’ way more bits of simultaneously whole round sphere, all 4 directions hemispheres involved holographically holosynch integrated bytes of information – per moment. Much in the same way that current research now shows such more present oriented ‘in their zone’ way of being solution generators actually are able to light up access way more parts of their brain - than conventional mere 10%

'thinkers'. In such a way that very much as a consequence of this increased, way more holographic encompassing, more bytes per moment much fuller matrix processing capability. One's awareness system seems to get carried up into the kind of much more here and now embedded, far more frames per moment – 'now light speed boosted' awareness processing place. To a point where time itself seems to start to slow down, much like being in a slow motion movie. Exactly what is reported by such 'in one's zone' solution oriented players in any field of endeavor. Thereby enabling one's self more time / space to feel much more brilliantly able to 'intuit / insight / see / improvise' one's way forward. In the very ways that are known to make it possible for such more 'in one's zone' processors to perform at their now much instantaneously in the moment whole field embedded – very best. Simply because trying to merely linear sequential 'think tank' one's way into a response is simply too slow. To be able to encompass the whole field of events going on simultaneously, in the way required in order to progress to the next higher order level - within this new kind of info synch way of playing out our great life oriented game.

With the whole point being, that it is very much like this new generation of computer game raised players. Actually seem to learn how to shift their central awareness nervous systems way more effectively than so called normal linear sequential solution generators. Into the very kind of more holographically embedded, and thus full matrix multi synch full expanded – much more full-on whole field present awareness place. Within which - inasmuch as their internal processors are able to wide band way better integrate many more bits of information per moment. They start to experience time & space go into slow motion - right in front of our very 'I's'. Very much as a consequence of this increased more intensive byte per moment in the moment processing capability. In such a way as to thus enable themselves to actually have much more in the moment clarity – with respect to their here and now take action oriented intention focused decision making processes. No matter how challenging the circumstances such more expanded awareness developed people - may find themselves being faced with. In relation to which it is incumbent upon them to find some way to move as effectively solution forward, as is humanely possible. In marked contrast to those whose other than

optimally wise - functional behavior. Seems to pretty constantly get locked into being emotionally motivated by a more narrow band, strictly problem focused, panic and fear driven, way of perceiving so called reality. Which is to say, always motivated by the very sort sympathetic (or adrenalin) fear based innervation – which makes it always seem based on being embedded within a speeded up time / space, rushed perspective - alone. Like one has very little awareness time to make effective decisions.

Here you have the huge reason why choline and endorphine (para-sympathetically) motivated people, as opposed to adrenalin (sympathetically) motivated people, seem to make great solutions seem easy. Whereas in marked contrast fear based motivated on adrenalin alone people, always seem to find life so constantly difficult and over stressfully challenging. (For a much more complete understanding of how to help your self find your in your zone way of being on a regular ongoing basis – as opposed to only once in while - as if quite by chance. Order our 2 vol 'Quantum You' operating your self into your most fulfilled possible max - manual. With respect to how yes you can – find your effortlessly empowered way of being – all the time. For some further understanding in relation to helping your self find this in your zone way of being as a matter of course - you may also want to read our next in line freebie article. 'In the river – It's all jazz')

O.K, Alright Already – So Just exactly what is enabling this shift into our holographic expansive, more intuitive insightful, - much more simultaneous / instantaneous light speed, 'in our zone' based way of full matrix connected information processing - Compared to old mere linear sequential, increasingly outmoded way too slow conventional, 'thought based' way of information processing - All going to mean for us as a potentially whole earth, whole person oriented, collection of societies in general, as well as for doing business through out our world as usual?

Well it is going to mean that for those who get it, our old ways of doing business are about to make a quantum up to light speed - jump. I.E. Like for examples from generating solutions based on more liner sequential snail mail limiting notions of _____ to much more core contextual, full matrix holographic expansive solutions, based on

First Before Jumping In To Be Creative / Inventive If You're Lucky Later – To Schooling That Say's Jump In First Into Whatever Most Draws You In & Start Inventing Now As the Means To Keep Building Your Information Base - From Leisure Ways of Playing Games That Are Linear Sequential 'Thinking Based' – To New Types of Games That Are Ever More Holographic 'Insighting Based; From Art Forms That Are Linear Sequential Based – To Art Forms That Are Even More Holographic Based; From Designing Structures At Any Level That Are Linear Sequential Mere Part Solution Based – To Those That Are Way More Holographically Integral Based; From Products That Are Most Designed Mostly In Isolation With & Thus Often Discordant In Relation To Other Products – To Products That Are Going To Be Designed More In Relation To & Thus Much More In Harmony With Other Products; From What Are My Orders – To How Can I Jump In & Help; From Separation & Separateness - To Fundamental No Difference & Non-Separation; From Dualism – To At-One-Ment; From I'm Somehow Better or Lesser Than You – To We Are All Children of The Infinite Source; From Creating Chaos & Conflict In Relation To That One Singular Source The Underlying Essence of Which Resides In All - To Creating Peace & Harmony With All Due Respect To That One Singular Most Source Which Can Be Found To Reside In All; From There's Simply No Other Way – To There's Always A Better Way; From Feeling Trapped & Compelled – To Feeling There's Got To Be An Escape Route – From I'm Being Forced To Harm – To How Can I Invent A Non-Harmful Solution; From Merely Believing God Is A Vengeful Demanding Force Who Rules Over Us Whom We Are At The Mercy Of - To Actually Experiencing We Have The Possibility To Become Integral Co-Creative Partners With That Infinite Source of Intelligence Out of Which All Manifestation Emerges; From Sensing This Source As An Ominous Force To Be Beg & Plead With – Toward Actually Waking Ourselves Up Into Experiencing The Underlying Essence of This Singular Most Source Within Us As A Harmonic Force of Love; From We Must Obey Orders From Above - To We All Have The Intelligence To Discover How To Harmonically Manifest Our Selves Forward Optimally In Tune With This Force; From Being Merely At the Mercy of Destiny - To Being Totally Empowered Toward Constantly Changing Our Destiny; From Wanting Only To Accumulate & Maintain Power For Me, Myself & My Tribe Alone – To Wanting To Help Everyone Find Their Own Best Great Life Inventive Way To Share Themselves Forward; From The Notion of A

Limited Definable Confinable Universe – To The Understanding of A Fundamentally Unlimited Continuously Expanding Universe Within Which We Are Co-Creatively Empowered To Keep On Inventing Endless Positively Great Possibilities – From Wanting To Hold & Confine Power Within The Hands of the Controlling Phew - To Wanting To Share & Expand Power Until It Spreads Like Wildfire To Encompass Every-One; From Feeling Like We Live In Hell - To Feeling Like We Have The Co-Creative Possibility To Emerge Into Heaven; From Life Ends At Death – To The Essence of Our Life Force Is Eternal; From Steadfast Territorial Nationalism Only At The Expense of Others - To One World Internationally Independent Yet At The Same Time Co-Operative Globalism; From Obeying What We Have Formerly Been Referring To As God As A Force Only Outside & Beyond Ourselves – Toward Finding What We Have Formerly Been Referring To As God As An Inwardly Attuned Power That Resides Within Each & Every One of Us

And these are just some of the major changes that are about to come flying up into our fields of more quantum level attuned awareness! The whole point is that people who tune into what these new much more holographic information integrating trends are all about. Are going to do extremely well for them selves. Inasmuch as they are going to be the One's who are going to find themselves most able to lead the way with new visionary solutions and products. The very kind of products that will blow our old ways of living – totally out of our old so called boxed in ways of playing within our so called reality – right out of the box! The greater truth is these trends are already so in motion, so apart of where our awareness is headed, thanks to the advent of various modern information processing systems, that they can't be stopped.
